

Drop in Monday August 8<sup>th</sup>

Bring:

A rhubarb leaf, or any other leaf with pronounced veins to this class. Big or small leaf. Also bring gloves for working with the cement.

I will have the rest of the supplies with me!

If you pick leaves ahead of time put the stem in water to keep veins plump.

See you Monday!

The leaves on display have been painted which we will not do Monday as cement has to cure for a while before handling it.
